Class: mapFilterToTrack

display~arr~mapFilterToTrack(arr, key)

```
new mapFilterToTrack(arr, key)
```

Filters the hashmap into a format like [{track_name: value}, {track_name: value2}...]

Parameters:

Name	Type	Description
arr	array	Array of objects of filter [{object1: ....}, {object2: ....}...]
key	string	String of the filter. For ex: "nameOfTracks", "genres", "instrumentalness"...

Source:	index.js, line 255
